

## OPEN

The Apache Software Foundation provides support for the Apache Community of open-source software projects, which provide software products for the public good

## INNOVATION

The Apache projects are defined by collaborative consensus based processes, an open, pragmatic software license and a desire to create high quality software that leads the way in its field

## COMMUNITY

We consider ourselves not simply a group of projects sharing a server, but rather a community of developers and users

The ASF is a United States private, 501(c)(3) not-for-profit charitable organization. Funds are needed to help ensure that Apache software projects continue to be freely available to users around the world. You may help the ASF reach its financial goals via:

### Individual Donations

For one-off or recurring gifts of any size, via credit card, PayPal, ACH, and more.

### ASF Sponsorship

For organizations, individuals, foundations, and endowments contributing \$5,000 or more.

**We welcome contributions  
of any size**

today*

THE **APACHE**® SOFTWARE FOUNDATION  
<http://www.apache.org/>

Established in 1999, the all-volunteer Apache Software Foundation (ASF) was formed with the mission to create software for the public good by:

- Providing a foundation for **open, collaborative** software development projects by supplying hardware, communication, and business infrastructure
- Creating an **independent** legal entity to which companies and individuals can donate resources and be assured that those resources will be used for the public benefit
- Providing a means for **individual volunteers** to be sheltered from legal suits directed at the Foundation's projects
- **Protecting** the Apache brand, as applied to its software products, from being abused by other organizations
- **Overseeing** +300 freely available enterprise-grade software projects, from Abdera to HTTP Server to Hadoop to Zookeeper
- Administering the popular **Apache License**, used in thousands of software solutions
