

# Welcome to the org.apache.forrest.plugin.output.Chart Plugin

## Table of contents

1 Apache Forrest - org.apache.forrest.plugin.output.Chart Plugin.....	2
2 Generating a Chart.....	2

## 1. Apache Forrest - `org.apache.forrest.plugin.output.Chart` Plugin

This plugin provides charting for Apache Forrest by integrating [JChart](#) into Forrest.

[View a set of sample graphs.](#)

## 2. Generating a Chart

To generate a chart simply use a URI in the following form:

```
/do/draw_chart/PATH_TO_CHART/CHART_NAME.CHART_TYPE
```

Where `PATH_TO_CHART` is the normal path to the [chart descriptor](#), `CHART_NAME` is the name of the [chart descriptor file](#) (without the `.xml` extension, and `CHART_TYPE` is how you want the format in which the chart is to be returned (for example, `.png`, `.jpg` or `.svg`).
