# Reserved Names

**Table of contents**

List of Names that are reserved by Lenya for various subsystems

- CSS Classes
- Sitemap variables
- Session variables

## 1 Session variables

- org.apache.lenya.cms.cocoon.acting.Authenticator.id
- org.apache.lenya.cms.cocoon.acting.Authenticator.name
- org.apache.lenya.cms.cocoon.acting.History
- protected_destination
- org.apache.lenya.cms.editor.HTMLForm.tempFile
- org.apache.lenya.cms.editor.HTMLForm.editFile
- org.apache.lenya.cms.ac.Identity
- org.apache.lenya.cms.cocoon.acting.TaskAction.parent_uri
- org.apache.lenya.cms.info.target

it seems that the convention is to use a proper class hierarchy for the session var name cookie variables should follow the same convention
