1. Apache Forrest - OpenOffice.org Plugin

This is an example site for the Apache Forrest OpenOffice.org Plugin. It provides examples of all the functionality in the plugin.

2. Using The OOo Plugin

2.1. Samples

See the samples in the menu on the left.

2.2. Document Title

The displayed title is taken from the meta-data of the OOo file. If you set the Title field in the OOo document `File -> Properties (General Tab)` Then this will be used, otherwise the OOo filename is used.
