Release Notes for Apache Forrest 0.2-dev

Table of contents

> **Warning:**
> Version 0.2-dev is a development release, these notes are therefore not complete, they are intended to be an indicator of the major features that are so far included in this version.

This plugin provides various mechanisms for extracting and displaying information about one or more projects.

1. Major Changes in Version 0.2-dev

> **Note:**
> This is not a complete list of changes, a full list of changes in this release is available.

1.1. Important Changes Code Base

- Enable project-level locationmap to define the location of the project:status file which contains the change notes. Therefore this can even be from a remote location. (DC)
- Add an automated index page that lists all projects in a category. Use `projectDetails/category/*.xml` to retrieve it. (RDG)
- Add an automated project index page that lists all projects grouped by Category. Use `projectDetails/category-index.xml` to retrieve it. (RDG)
- Add an automated index page that lists all projects using a specific language. Use `projectDetails/*-lang.xml` to retrieve it. (RDG)
- Add an automated project index page that lists all projects grouped by language. Use `projectDetails/lang-index.xml` to retrieve it. (RDG)
- Add an automated index page for all projects using a specified programming language. Use `projectDetails/*-lang.xml` to retrieve it. (RDG)
- Add an automated site.xml snippet that provides links to an index page for all languages in use in all projects. XInclude `projectDetails/lang_index.siteSnippet.xml` in your site.xml file. (RDG)
- Add an indexing capability for all known project descriptors. (RDG)
- Use locationmap to expose plugin resources. (RDG)
- Add projectDetails page using the DOAP.xml descriptor. (RDG)
