

Doing QA at OpenOffice.org

by

Joost Andrae

Joost.Andrae@Sun.COM

- About the speaker
- Doing QA at OpenOffice.org
 - facts about what we've done so far
 - Statistics about the QA team
 - Statistics about OpenOffice.org (IssueTracker statistics)
 - contributing as QA member
 - confirming issues
 - available types of OpenOffice.org automation
 - doing localization QA
 - working together with OpenOffice.org port contributors
 - About IssueTracker keywords
 - writing and using testplans
 - Releases
 - Developer Builds
 - QA events (bug day events, discussion about timezones, using IRC)
 - Introduction in Automated GUI Testing (follow-up by Joerg Sievers)

- Conclusion/questions

About the speaker

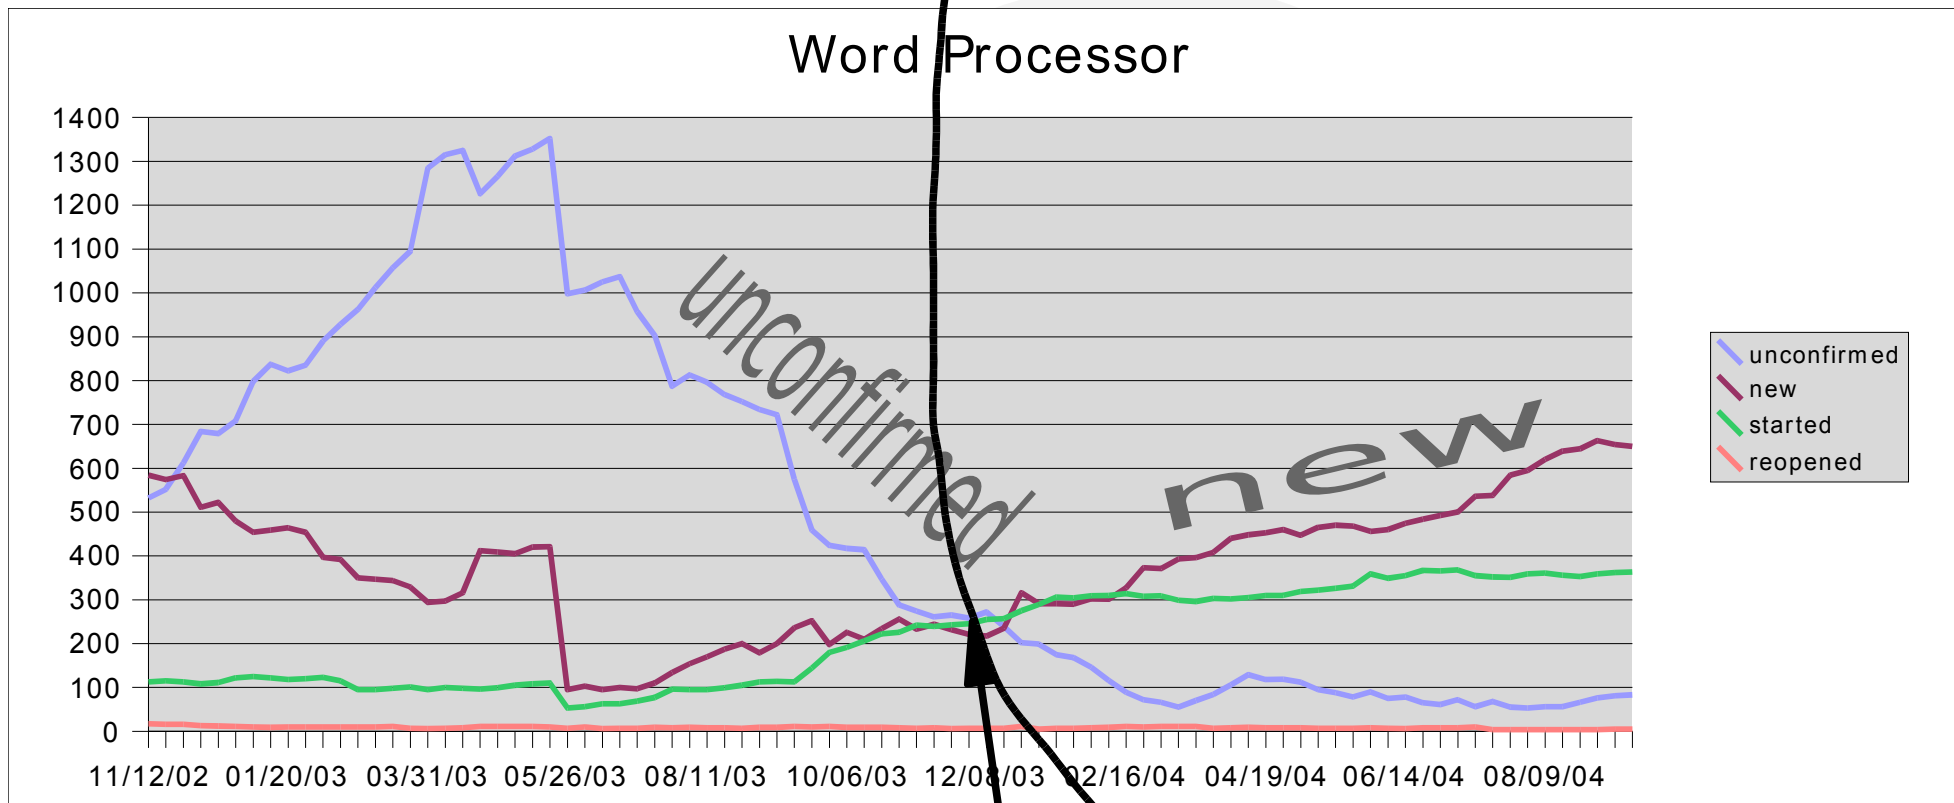

- Joost Andrae
 - QA & Coordination, Hamburg dev. team
 - since 1995 working at Hamburg dev. team
 - QA & testing of StarCalc, StarMath, StarChart, Sun ONE Webtop
 - Contributor of OpenOffice.org QA project
 - Doing OOo release build tests of most of OOo master & snapshot builds
 - performance measurements (StarOffice)
 - QA&testing „UNIX printing“
 - Coordination of Early Access programs

2004-09-16

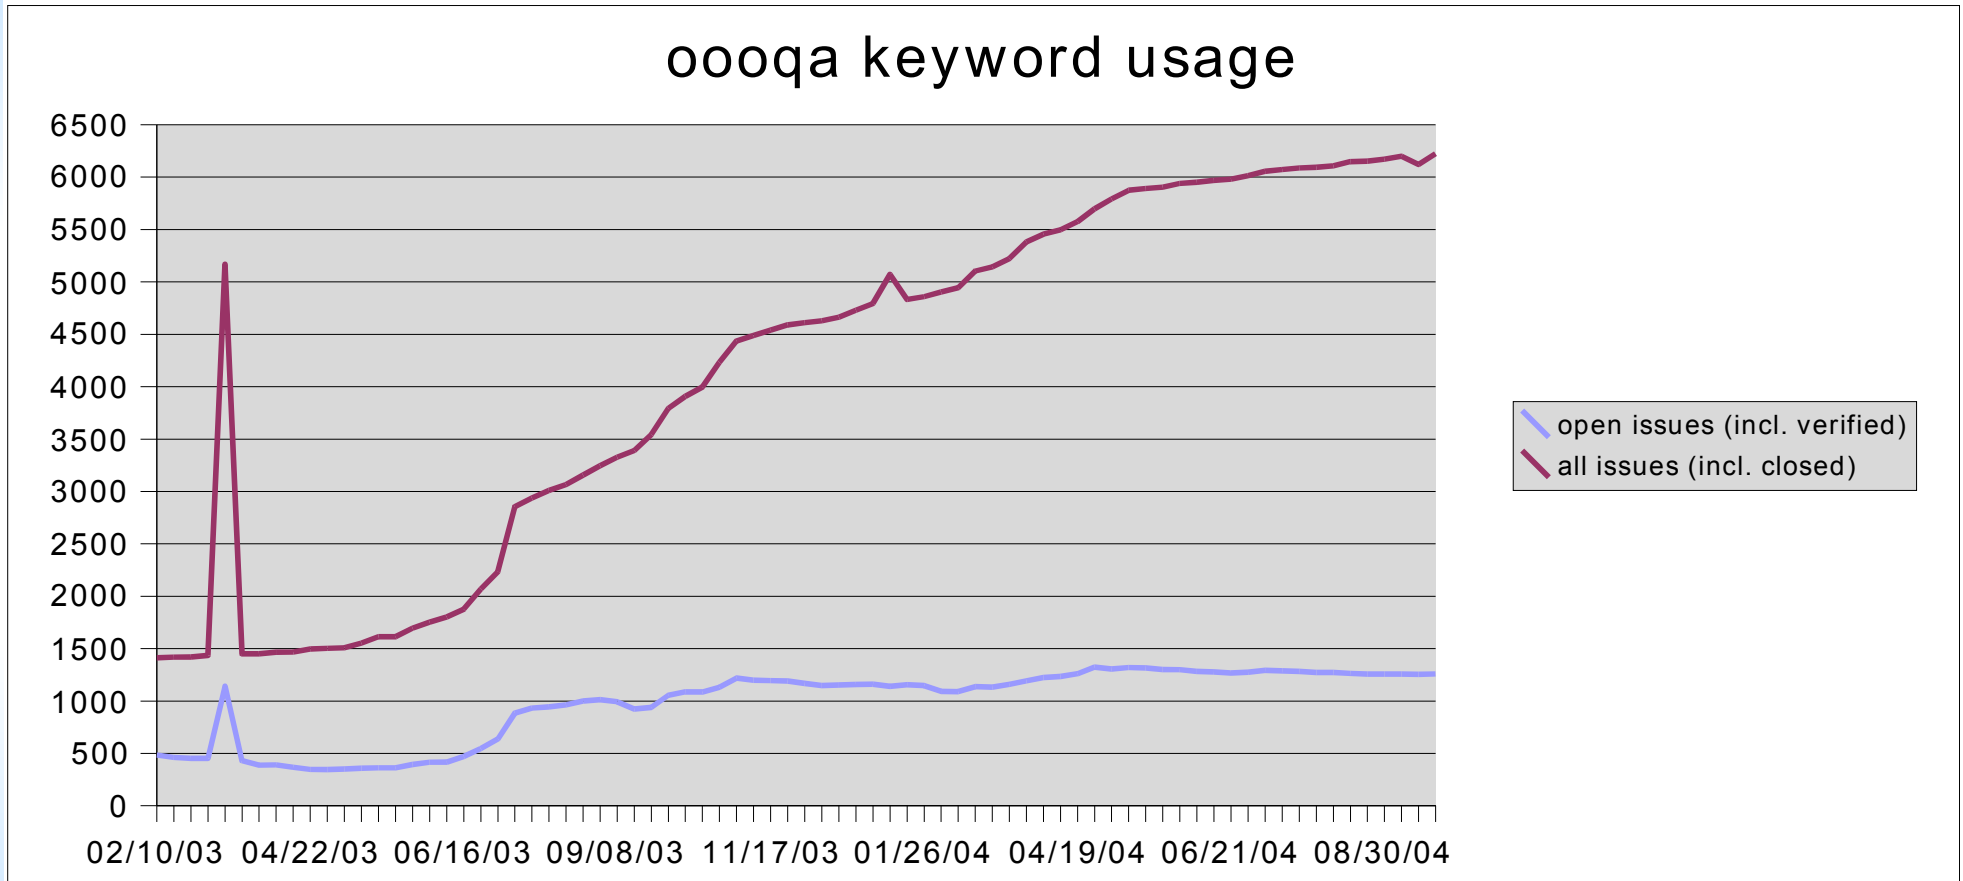

- Statistics about the work done by the QA team

based on http://qa.openoffice.org/files/documents/77/1395/iz_statistic_2.sxc

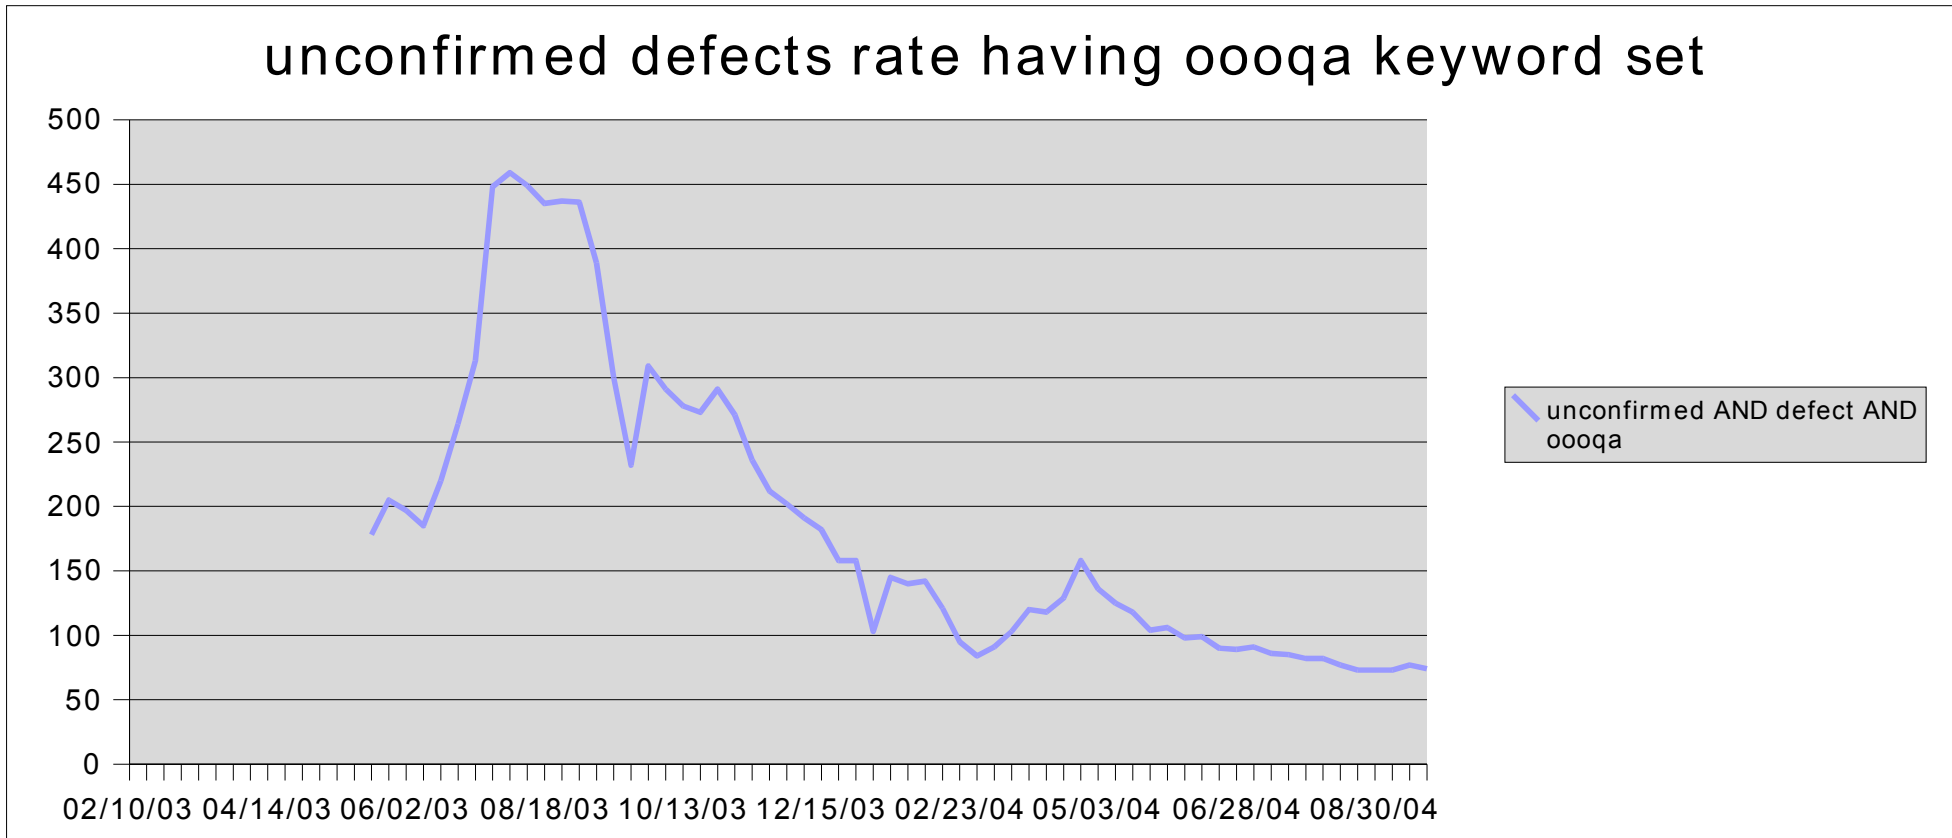

success

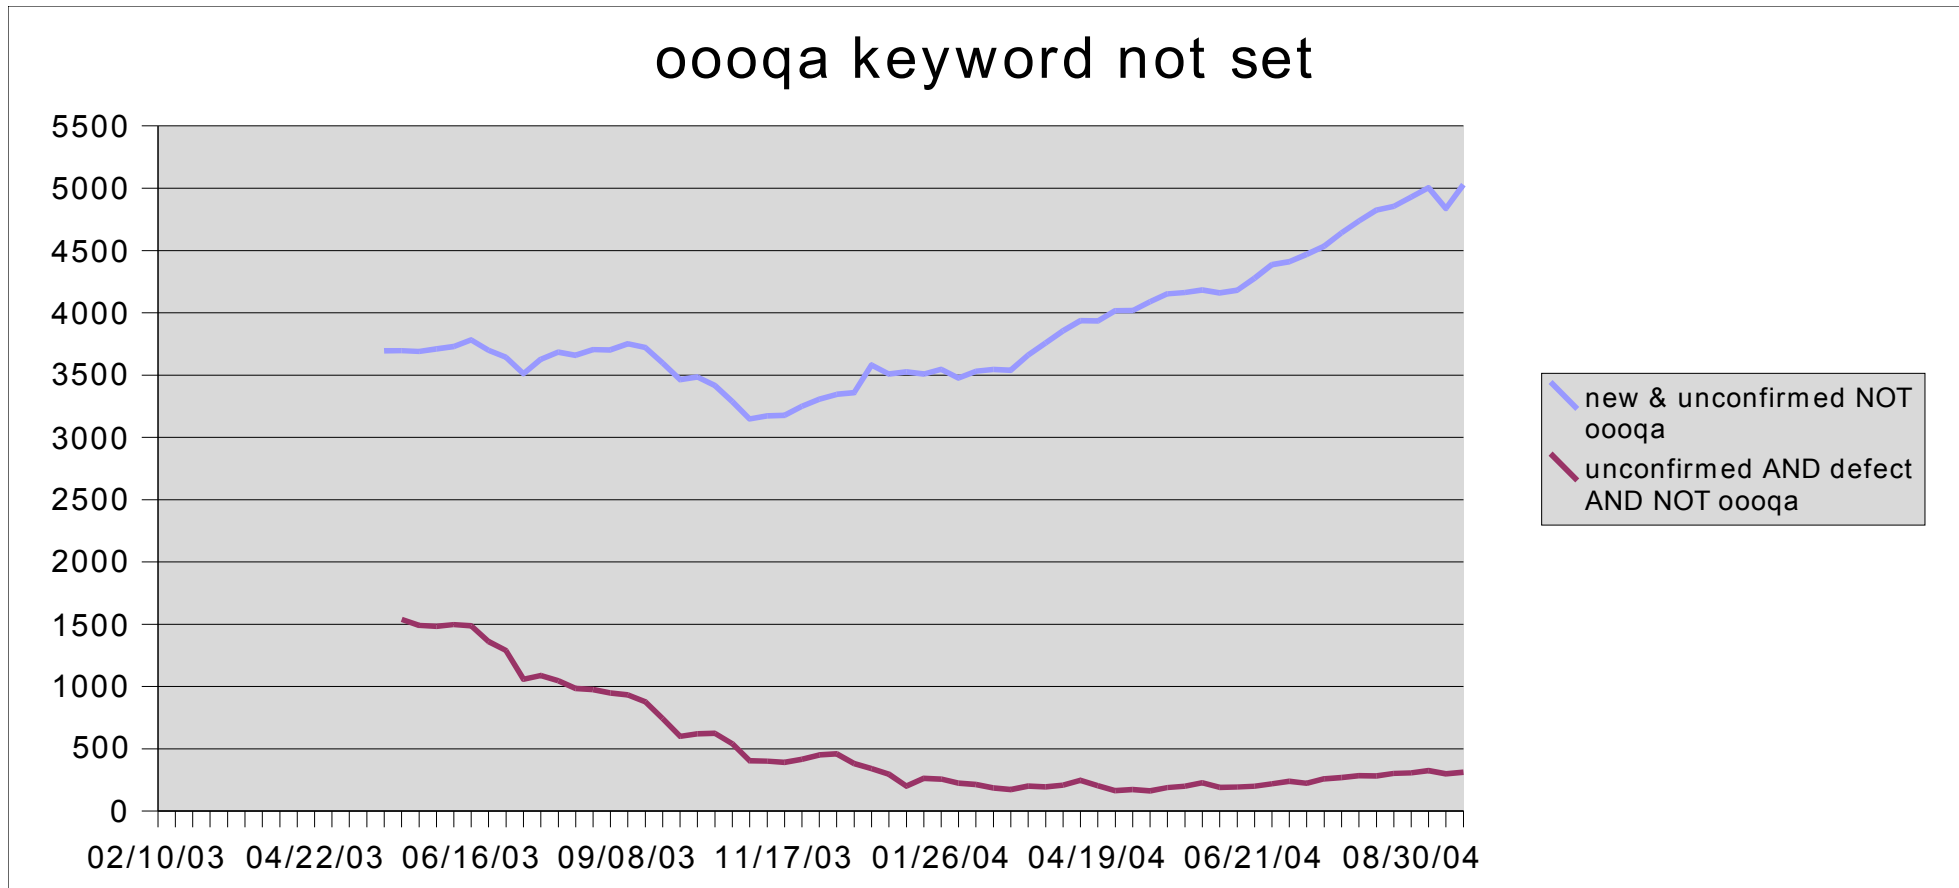

- Statistics about the work done by the QA team

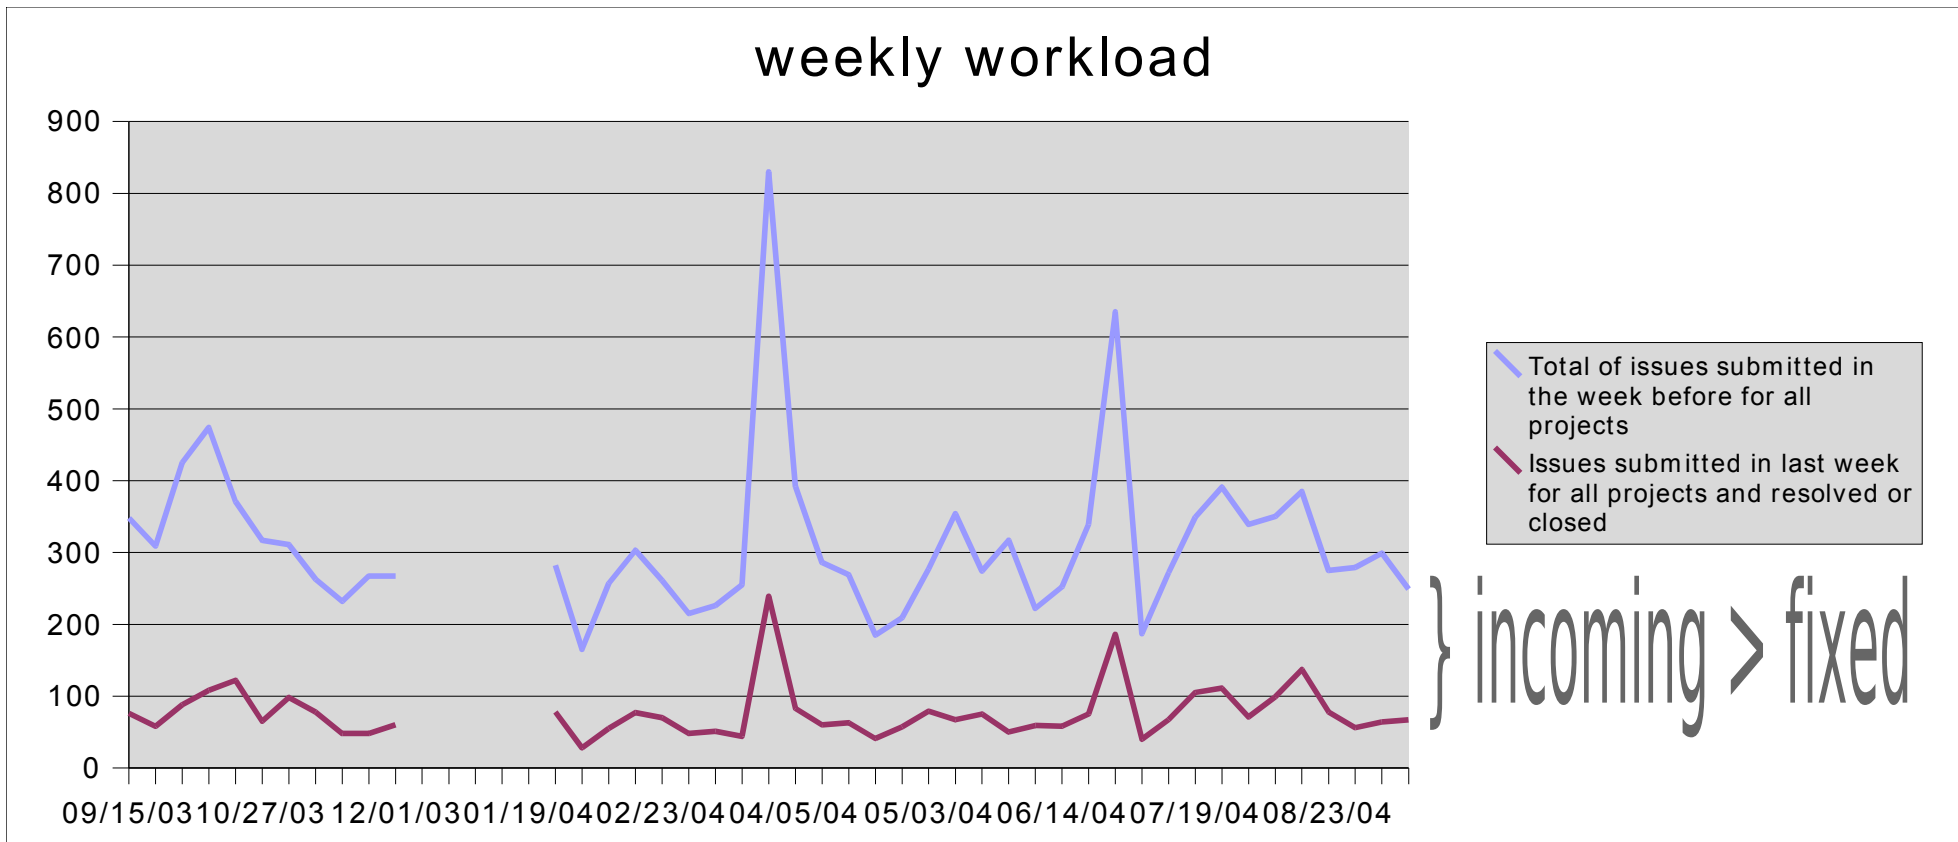

- Statistics about the work done by the QA team

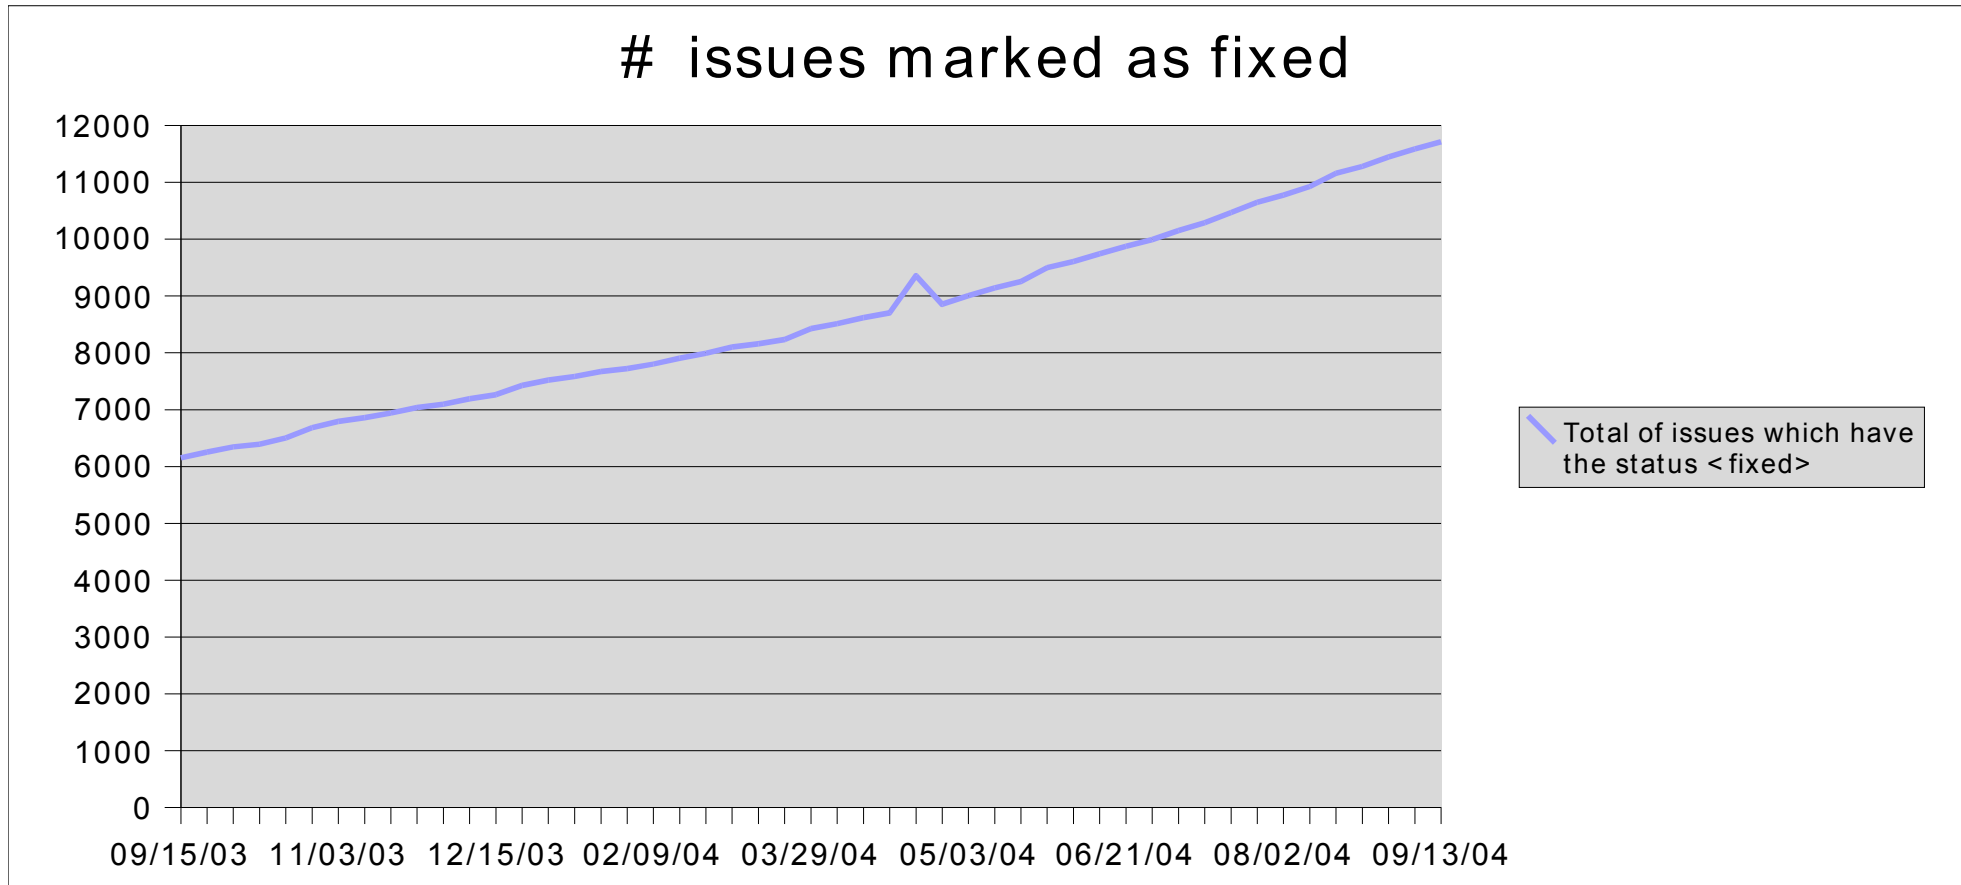

- Statistics about the work done by the QA team

- Statistics about the work done by the QA team

- Contributing as a QA member
 - What can you do to contribute to the project ?
 - confirming issues
 - writing test plans (more to come soon)
 - doing manual tests based on test plans
 - doing automated tests based on API scripts
 - doing automated GUI tests based on testtool scripts
 - communicate within QA mailing list (help others)
 - doing IssueTracker statistics ;-)
 - localization testing
 - testing on ports (Mac OSX, Free BSD, PPC Linux)
 - helping with knowledge within special areas (mostly platform dependend)

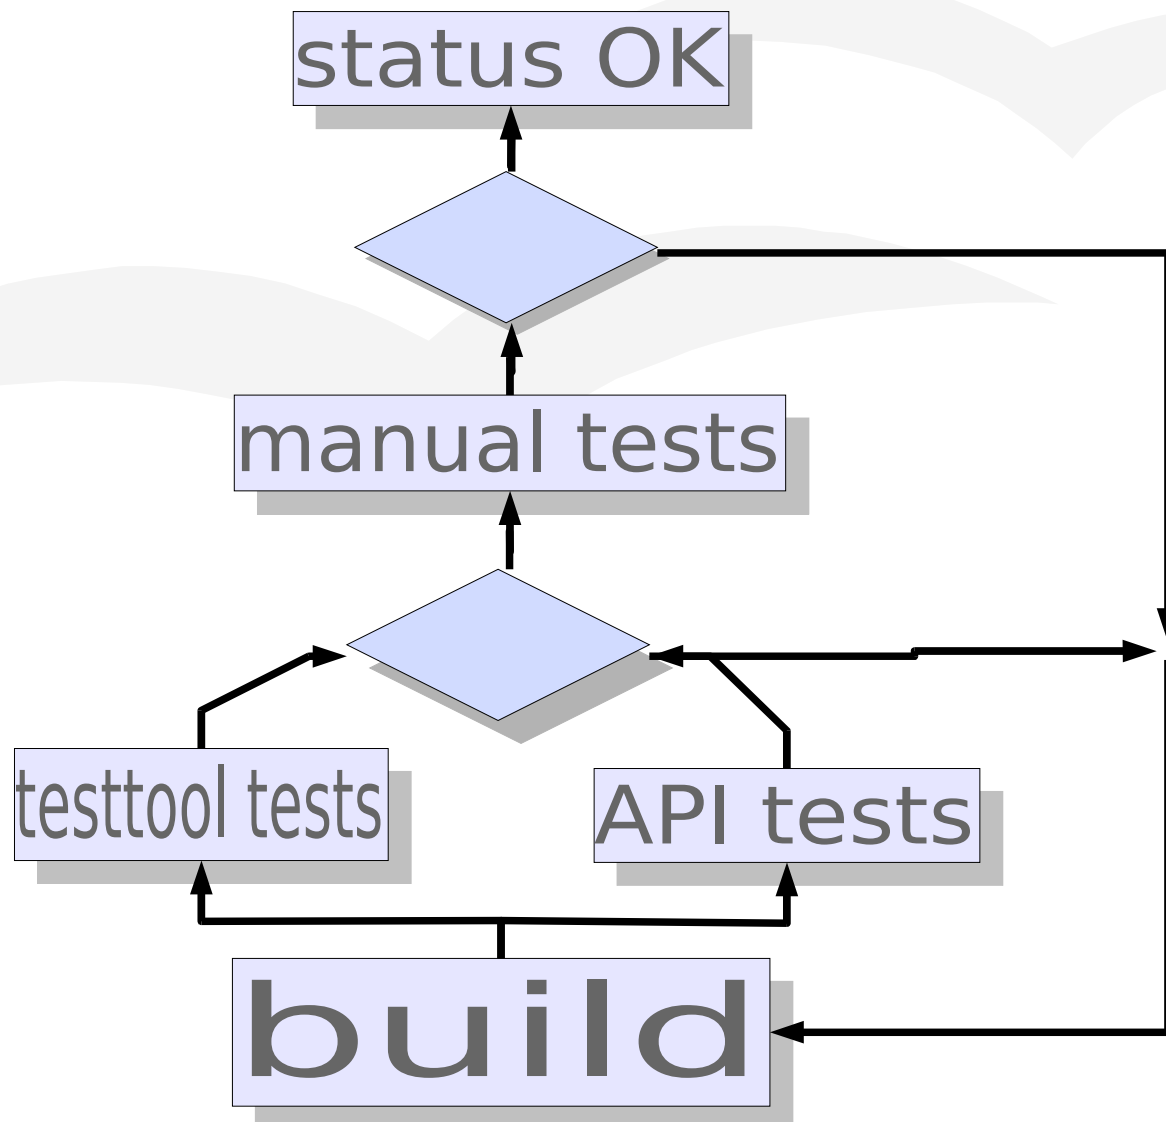

Confirming Issues

- What do I need to do to confirm issues
 - get an **OpenOffice.org** account and register at the **QA** project
 - **read** instructions at **<http://qa.openoffice.org/helping.html>**
 - send an email to **dev@qa.openoffice.org** mailing list with a header containing the subject line **Volunteer Privileges - <Your OpenOffice.org Userid Here>** to get additional privileges to confirm issues
- communicate with others about issues where you need help

OpenOffice.org Automation

- There are different ways to automate tests
 - manual tests
 - automated GUI tests (testtool)
 - automated API tests

- What could be done to help localizations ?
 - Get in contact to localization team lead to coordinate QA efforts.
 - localized resources need to be tested (using the testtool)

broken resource files can crash the application

different

resource files
sample documents
linguistic files

Testing OOo ports

- What can be done to help porters ?
 - Get in contact with the porters. (eg. ask them on **dev@porting.openoffice.org**)
 - try to do the whole QA cycle (manual and automated QA)
 - please give status at **dev@qa.openoffice.org**

Issue[Zilla,Tracker] keywords

- Which keywords can be used by QA ?
 - **crash** (can be set to identify this issue as crash)
 - **needhelp** (someone needs assistance in whatever form)
 - **needmoreinfo** (submitter has to provide more information)
 - **oooqa** (this issue has been touched by OOo QA team member)
 - **regression** (feature got broken compared to an older version)
 - **valgrind** (if you find a bug using valgrind then set this keyword)

- About testplans (test case)
 - manual tests
 - automated tests (most test cases should be automated)

a test case describes **step by step** what to test
testplans should be **readable**
all features within a **specification document** should have a testplan
we (Sun) plan to provide testplans soon

Testing release candidates

- What can be done to test release candidates ?
 - Have a look for announcements of new release candidates on the releases list
 - A release candidate should be stable
 - If you find important (show stopper) issues within a RC then please communicate the issue ID to **releases@openoffice.org** to get them addressed with higher priority

Testing developer builds

- What can be done to test developer builds ?
- look here
<http://download.openoffice.org/680/index.html> to get the latest 2.0 developer snapshot
- These builds can be **unstable**
- Please read **release notes** carefully
- **file bugs** to get them addressed before the 2.0 release

- 'Bug day' event
 - Party time after successful negotiation on dev@qa

discuss time zones involved

start to chat on [#qa.openoffice.org](irc://irc.freenode.net)
