Apache PDFBox is undergoing incubation at the Apache Software Foundation and has since not published a new release. We're trying to fix that as soon as possible.

3 Subversion Repository

To fetch the latest source code from the trunk in the Subversion repository, just run the following command:

```
svn checkout http://svn.apache.org/repos/asf/incubator/pdfbox/trunk/
```

Main Repository (US)	http://svn.apache.org/repos/asf/incubator/pdfbox/trunk/
Mirror (EU)	http://svn.eu.apache.org/repos/asf/incubator/pdfbox/trunk/

You can also browse the Subversion repository using ViewVC:
