

Apache Lenya modules documentation

Table of contents

1 Introduction.....	2
---------------------	---

Warning:

Some of Apache Lenya modules are still under heavy development. Please consult the module documentation about current state of development.

1. Introduction

Modules are packages providing a certain set of resources or functionality. The aim of this section in the documentation is to group the information needed to work with a certain module into one entry point.

Examples:

- a resource type (e.g., docbook module)
- a repository implementation (e.g., jdbc module)
- a collection of XSLTs (e.g., content2svg module)

Some modules are included in the Lenya distribution:

- **lucene** - search functionality
- **sitetree** - manage documents in a tree-like structure
- **jcr** - store content in a [JCR](http://www.jcp.org/en/jsr/detail?id=170) (<http://www.jcp.org/en/jsr/detail?id=170>) repository
- **xhtml** - XHTML-based resource type
- **links** - resource type to manage link lists
- **lenyadoc** - adds the `lenyadoc://` protocol
