

Apache Mahout - code quality reports

Isabel Drost

Table of contents

1 Overview.....	2
2 Online reports.....	2

1. Overview

The Mahout projects uses several maven plugins to generate code quality reports on a daily basis. This includes findbugs analysis, duplicate code detection, test coverage. Those reports are published through Hudson. In addition JavaDocs for the current trunk version are available online within these reports as well.

2. Online reports

- core module
- utils module
- matrix module
- examples module
- taste web application
