

WebServices - Axis

1. Requirements

There is a non-requirements section below.
Release cycles are explained below.

2. Non-requirements (won't be supported)

We find the SOAP spec. to be unclear on these issues so we decided not to support them.

1. RPC calls in SOAP headers
2. Multiple RPC calls in a single SOAP message

3. Releases and test cycles

We're planning on releasing alpha1 (a1), alpha2 (a2), beta, and 3.0.

alpha is a preview.

subsequent alphas are to show the growing set of features and docs and test cases and all that.

Beta is functionally complete.
