2.1 What is official version of WSIF? How to get the latest version?

The official version of WSIF is found here on the Apache web site. Nightly builds are available at http://xml.apache.org/dist/axis/nightly/

The xml-axis-wsif-src.zip contains source distribution and wsif-bin zip file contains a built wsif.jar along with the API Javadoc.

The version available from [Alphaworks](#) is no longer maintained.

2.2 What are differences between WSIF and JAX-RPC?

TODO

2.3 Where are extensions to WSDL that are supported by WSIF documented?

This is described in [separate document](#)
