History of Changes

Table of contents

1. Version xml-commons-1.0 (not-yet-released)

1.1. build

- Added xml-commons/readme-build.txt to start to explain the build system. (crossley)

1.2. docs

- Published the new website. Hooray. (crossley)
- Added the brilliant xml-commons logo. (crossley) Thanks to Nicola Ken Barozzi.
- Added some ToDo items and noted some issues in How-to Forrest. (crossley)
- Added some content as overview for each component. Added some ToDo items. (curcuru)
- Added placeholder docs and tabs for components. (crossley)
- Built demo website using Forrest. Gleaned content from `xml-commons/README.html` (crossley)
- Fixed some license issues in various areas. (crossley)
- Improved the build process for docs and consistency between the website and the distribution. Integrated javadocs with website. (crossley)

2. Version xml-commons-resolver-1.1 (2003-11-05)

2.1. code

- The `CatalogManager` class is no longer static. It is now possible to instantiate several catalog managers and each manager can manage several catalogs. (ndw)
- System catalogs are always loaded. (ndw)
- Tests/Examples available in the `tests/resolver/` directory. (ndw)
- Bootstrap resolver for loading catalog files. Avoids the Catch-22 of having to resolve the catalog.dtd before the resolver is in action. (ndw)

2.2. docs

- Annotated example CatalogManager.properties for Resolver (see discussion) and new Tips page. (crossley) Thanks to Mark Diggory.
- Copied the docs built by forrest into the distribution and linked to javadocs. (crossley)
- Added brief descriptions of the following new functionality to the release notes ... (ndw)

3. Version xml-commons-resolver-1.0 (2002-11-12)

3.1. build

- This release includes just the 1.0 XmlResolver component, by request from coccoon-dev and others. It is released for users who just want to use the Resolver and don't need the rest of xml-commons. Pending discussion on commons-dev, we believe that future xml-commons releases

will be separated out in this manner (external, resolver, which, etc). (curcuru)

4. Version xml-commons-1.0b2 (2002-02-06)

4.1. code

- New code! org.apache.xml.resolver.Resolver: Norm Walsh's entity resolver utility is now checked in and building! (curcuru)
- Minor javadoc fixes. ()

4.2. docs

- Various LICENSE.* and README.* files for our external sources. (curcuru)

5. Version xml-commons-1.0b1 (2002-01-11)

5.1. code

- Which - org.apache.env.Which - a simple environment check utility for xml-related items in your JVM's environment: 1.0 funtionality working. (curcuru)
- External - java/external/build/xml-apis.jar containing the follow packages: (curcuru)
- DOM Level 2 including all base files and HTML and CSS DOMs; from w3c.org (curcuru)
- JAXP code roughly equivalent to JAXP 1.1.3; for reference releases from Sun, see java.sun.com/xml (curcuru)
- SAX 2.0-r2-prerelease and SAX2-ext-1.0; plus bugfixes to org.xml.sax.helpers.ParserAdapter (make compile in JDK 1.1.x) and AttributesImpl (minor removeAttribute bug); from megginson.com although SAX maintenance has now moved to sax.sourceforge.net (curcuru)

6. Version 0.1 (2001-04-26)

6.1. build

- Project started. See history. (curcuru)
