The Apache XML Graphics Project - Mailing Lists

Table of contents

Every volunteer project obtains its strength from the people involved in it. Mailing lists provide a simple and effective communication mechanism.

You are welcome to join any of these mailing lists (or all of them if you wish). You can choose to lurk, or actively participate. It's up to you. Before you join these lists, you should look over the resources in the Reference Library section. As with any mailing list, you should probably read any FAQ postings or simply read a sampling of postings on the list before posting your first question.

1 Usage Notes

Archives are generally named after the project they're about (duh!) with a suffix that denotes the subjects covered. Common suffixes are:

- `*-dev` Developer list - for technical questions about the product, code patches, bug submissions about advanced functionality, etc.
- `*-users` Users list - for general usage questions about the product from an end-users perspective
- `*-commits` commit list - this is a read-only list that sends out email with details of all changes to that project's CVS, SVN or Wiki repository

The ezmlm mailing list controller accepts commands by sending emails to `<listname>-command`, generally like the following:

- `*-subscribe` Subscribe your current email address to the list
- `*-unsubscribe` UnSubscribe your **current** email address from the list
- `*-help` get Help on mailing list commands

> **Example**
>
> If you want to unsubscribe from the XML Graphics General mailing list you send an empty mail to `general-unsubscribe@xmlgraphics.apache.org`.

2 Public Archives

Archives of all public mailing lists can be found here:

- http://mail-archives.apache.org/mod_mbox/ (mod_mbox archives)
- http://xmlgraphics.apache.org/mail/ (gzipped mbox files)
- Some lists are also available from http://marc.theaimsgroup.com/, The Mail Archive, GMANE, Nabble and MarkMail.

3 XML Graphics General Mailing List

Low Traffic Subscribe Unsubscribe

This list is for issues that span across all xmlgraphics.apache.org projects, whether technical or organizational. Discussions about specific code bases should be redirected to one of the codebase-specific lists below, except for XML Graphics Commons which is discussed here.

Archives:

- http://mail-archives.apache.org/mod_mbox/xmlgraphics-general/ (mod_mbox archives)
- http://xmlgraphics.apache.org/mail/general/ (gzipped mbox files)

4 XML Graphics Commits Mailing List

Low Traffic Subscribe Unsubscribe

This is a read-only list that sends out email with details of all commits to the Apache XML Graphics Commons subproject, the Apache XML Graphics project website repository and to its Wiki.

Archives:

- http://mail-archives.apache.org/mod_mbox/xmlgraphics-commits/ (mod_mbox archives)
- http://xmlgraphics.apache.org/mail/commits/ (gzipped mbox files)

5 Batik Users Mailing List

Medium Traffic Subscribe Unsubscribe

This is the list for active users of the Batik project, where issues regarding installation and use of Batik are discussed. Also code changes and new releases are announced on this list.

Archives:

- http://mail-archives.apache.org/mod_mbox/xmlgraphics-batik-users/ (mod_mbox archives)
- http://xmlgraphics.apache.org/mail/batik-users/ (gzipped mbox files)

- http://xmlgraphics.apache.org/mail/batik-commits/ (gzipped mbox files)

8 FOP Users Mailing List

Medium Traffic Subscribe Unsubscribe

This is the list for active users of the FOP project, where issues regarding installation and use of FOP are discussed. Also code changes and new releases are announced on this list.

Archives:

- http://mail-archives.apache.org/mod_mbox/xmlgraphics-fop-users/ (mod_mbox archives)
- http://xmlgraphics.apache.org/mail/fop-users/ (gzipped mbox files)

Mailing Notes
It is usually a good idea to state the FOP & JDK/JRE version and the operating system you are using. Also, if you are attaching large binary files (PDF, JPG, etc.), please consider attaching a minimal, appropriate B&W GIF, JPG or PNG that conveys the necessary information instead. A good alternative is to put the files on a web server.
