

# ZooKeeper 3.3.5 Release Notes

by

## Table of contents

1 Changes Since ZooKeeper 3.3.4.....	2
--------------------------------------	---

These release notes include new developer and user facing incompatibilities, features, and major improvements.

See [3.0 release notes and migration instructions](#) if you are upgrading from version 2 of ZooKeeper (SourceForge) to version 3 or later.

## 1 Changes Since ZooKeeper 3.3.4

Issue	Notes
Bug	
<a href="#">[ZOOKEEPER-973]</a>	bind() could fail on Leader because it does not setReuseAddress on its ServerSocket
<a href="#">[ZOOKEEPER-1089]</a>	zkServer.sh status does not work due to invalid option of nc
<a href="#">[ZOOKEEPER-1309]</a>	Creating a new ZooKeeper client can leak file handles
<a href="#">[ZOOKEEPER-1352]</a>	server.InvalidSnapshotTest is using connection timeouts that are too short
<a href="#">[ZOOKEEPER-1353]</a>	C client test suite fails consistently
<a href="#">[ZOOKEEPER-1367]</a>	Data inconsistencies and unexpired ephemeral nodes after cluster restart
<a href="#">[ZOOKEEPER-1386]</a>	avoid flaky URL redirection in "ant javadoc" : replace "http://java.sun.com/javase/6/docs/api/" with "http://download.oracle.com/javase/6/docs/api/"
Improvement	
<a href="#">[ZOOKEEPER-1345]</a>	Add a .gitignore file with general exclusions and Eclipse project files excluded
<a href="#">[ZOOKEEPER-1389]</a>	it would be nice if start-foreground used exec \$JAVA in order to get rid of the intermediate shell process
