

Using Apache Jetspeed To Build Dynamic, Content Driven Portals

Kevin Burton
burton@apache.org

What is Jetspeed?

- RSS
- OCS
- remote content management
- content distribution mechanisms (HTTP/WAP/AvantGo/Mozilla Sidebar)
- XML

What is Jetspeed? (cont'd)

- Syndication
 - detail syndication providers
- Cocoon
- Turbine
 - quick intro of what Turbine does
- Requirements

History

- Creation of projects
- Adoption of corporations

Jetspeed 1.2

- New configuration mechanism
- New build configuration for newbies... tomcat-bundle

Jetspeed 2.0

- Removal of Castor and replacement is Xjay
- Tighter integration with Cocoon 2.0
- Removal of RunData so that we can have disconnected operation
 - this has been a problem with threaded portlet development
